Cephalalgia

An International Journal of Headache

VOLUME 16
1996

SCANDINAVIAN
UNIVERSITY PRESS

Oslo, Stockholm,
Copenhagen, Oxford, Boston

Cephalalgia

Founding Editor, Ottar Sjaastad; Editor-in-Chief, K. M. A. Welch, USA; Assistant Editors, Howard Feit, Nabih Ramadan and Gretchen Tietjen, USA; European Editors, Lars Edvinsson, Sweden and Marcia Wilkinson, UK; Book Review Editor, Anne MacGregor, UK; Historical Section Editor, Hansruedi Isler, Switzerland.

EDITORIAL BOARD

Frank Andrasik, USA
Michael Anthony, Australia
Otto Appenzeller, USA
Bo Bille, Sweden
J. N. Blau, England
Nikolai Bogduk, Australia
Marie-Germaine Bousser, France
Naomi Breslau, USA
G. W. Bruyn, Netherlands
Gennaro Bussone, Italy
Gabriela Buzzi, Italy
Desmond Carroll, England
Giovanni D'Andrea, Italy
Jackie de Belleroche, UK
Milena De Marinis, Italy
S. I. Dexter, England
H. C. Diener, Germany
Peter Drummond, Australia
John Edmeads, Canada
Karl Ekbom, Sweden
Bjørn Ellertsen, Norway
Fabio Facchinetti, Italy
Marcello Fanciullacci, Italy
M. D. Ferrari, Netherlands
Lars Friberg, USA
Marek J. Gawel, Canada
Vivette Glover, UK
P. J. Goadsby, Australia/London
Hartmut Göbel, Germany
Steven R. Graff-Radford, USA
Vincenzo Guidetti, Italy
Jan Hardebo, Sweden
A. Murray Harper, Scotland
P. Henry, France
Rachel Hering, Israel
Judith Hockaday, England
Hisaka Igarashi, Japan
Lee Kudrow, USA
Ashraf Kurdi, Jordan
Arieh Kuritzky, Israel
James W. Lance, Australia
Martin Lauritzen, Denmark
Tony J. F. Lee, USA
Richard B. Lipton, USA
Ninan Mathew, USA
James McCulloch, Scotland
Kathleen Ries Merikangas, USA
Harold Merskey, Canada
Michael A. Moskowitz, USA
G. Nappi, Italy
Giovanni Nattero, Italy
Jes Olesen, Denmark
John Pearce, UK

Dewey Ziegler, USA

Cephalalgia is included in the ADONIS service. Accordingly, copies of individual articles are available on compact discs (CD-ROM) and can be printed out on demand. An explanatory leaflet is available from the publisher.

Information about journals and books from Scandinavian University Press is available on our homepage on the world wide web, URL-address http://www.scup.no

PROGRAMME *Cephalalgia* is published eight times per year and contains original papers on all aspects of headache. The journal provides an international forum for original research papers, review articles, and short communications. Hypotheses may also be published. Supplements are supplied free of charge to the subscribers and copies can be purchased on application to the publisher.

Contributions appearing in this journal are abstracted and indexed in *Biological Abstracts, Biotechnology Citation Index, Chemical Abstracts (1981–1983), Current Advances in Ecological and Environmental Sciences, Current Contents/Clinical Medicine, Current Contents/Life Sciences (1993–), Excerpta Medica/EMBASE, FaxonFinder, Index Medicus (1981–)/MEDLINE, Index to Dental Literature, INIS Atomindex, Medical Documentation Service, National Epilepsy Library and Resource Center, Neuroepidemiology, Neuroscience Citation Index, Nutrition Research Newsletter, Psychological Abstracts/Psyc INFO (1993–), Nuclear Medicine Literature, Research Alert, Science Citation Index (1993–), SciSearch.*

MANUSCRIPT ADDRESSES Contributors are requested to send four copies of their manuscripts to: Editor-in-chief of *Cephalalgia*, K. M. A. Welch, Henry Ford Hospital and Health Science Center, Department of Neurology, 2799 W. Grand Blvd., Detroit, MI 48202, USA. Fax: +1 313 876 1466. *Book Review* manuscripts should be sent to Anne MacGregor, City of London Migraine Clinic, 22 Charterhouse Square, London EC1M 6DX, UK.

BUSINESS ADDRESS Communications concerning publishing and subscription matters (copyright, requests for permissions, reprints, advertising, subscriptions, distribution, back issues, manuscripts, proofs and orders for offprints, etc.) should be addressed to the publisher: Scandinavian University Press, Journals Division, PO Box 2959 Tøyen, 0608 Oslo, Norway (Tel: +47 22 57 54 00, Fax: +47 22 57 53 53, E-mail: subscription@scup.no). Customers in the US and Canada are invited to address the North American Office as follows: Scandinavian University Press North America, 875 Massachusetts Avenue, Ste. 84, Cambridge, MA 02139, USA (Tel: +1 617 497 6515, Fax: +1 617 354 6875. Toll-free telephone: +1 800 498 2877). Email 75201.571@compuserve.com.

SUBSCRIPTION PRICE One volume (eight issues)—Institutions USD 255.00. IHS members USD 115.00. Nordic countries: Institutions NOK 1530.00. Airmailed to subscribers worldwide. In Japan, all subscriptions should be ordered through the Maruzen Co. Ltd., 3–10 Nihonbashi 2-Chome, Chuo-ku, Tokyo 103, Japan. This journal can be ordered in microform from University Microfilms International, 300 N. Zeeb Rd., Dept. P.R., Ann Arbor, MI 48106, USA.

Cephalalgia (ISSN 0333-1024) is published eight times per year by Scandinavian University Press, P.O. Box 2959 Tøyen, 0608 Oslo, Norway. Periodical postage paid at Jamaica, NY 11431, USA. Postmasters: Send address changes to Scandinavian University Press North America. Air freight and mailing in the USA by Publications Expediting Inc.

All rights reserved; no part of the publication *Cephalalgia* may be reproduced, stored in a retrieval system, or transmitted in any form or by any means; electronic, mechanical, photocopying, recording or otherwise without prior written permission from Scandinavian University Press as agent for International Headache Society.

Special regulation for photocopies in the USA: Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Scandinavian University Press for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided the fee of US$9.00 per article is paid to CCC, 27 Congress Street, Salem MA 01970, USA. 0333-1024/96/US$9.00. This authorization does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must be obtained from Scandinavian University Press.
Typeset and printed in the UK by H. Charlesworth Ltd., Huddersfield.

Cephalalgia 1996;16. Oslo. ISSN 0333-1024

Subject index

3,4-dihydroxyphenylacetic acid
Cerebrospinal fluid tyrosine and 3,4-dihydroxyphenylacetic acid levels in migraine patients, 56
311C90 (Zolmitriptan)
311C90 (Zolmitriptan), a novel centrally and peripheral acting oral 5-hydroxytryptamine-1D agonist: a comparison of its absorption during a migraine attack and in a migraine-free period, 270
311C90 and sumatripan produce indistinguishable CNS adverse event profiles, 389
The combination of 311C90, a novel antimigraine compound, and oral propranolol in healthy subjects, 395
Minimal interaction between 311C90, a novel antimigraine compound, and oral pizotifen, 395
The high efficacy of 311C90 in treating migraine headaches is maintained in patients using oral contraceptives, 396
311C90 has no clinically significant effects on blood pressure, 398
Confirmation of the long-term efficacy of 311C90 in the acute oral treatment of migraine, 399
Confirmation of the long-term safety and efficacy of oral 311C90 in the acute treatment of migraine: demographic analysis from a study > 20,000 treated attacks, 400
Oral 311C90 is effective in treatment of menstrual migraine, 400
5HT agents
Sumatriptan: vasoactive effect on human dural vessels, demonstrated by subselective angiography, 224
Autoradiographic distribution of [3H] sumatriptan-binding sites in post-mortem human brain, 317
Serotonin syndrome complicating migraine pharmacotherapy, 323
Zolmitriptan inhibits c-fos expression in the dorsal horn of the medulla and upper cervical horn evoked by sagittal sinus stimulation in the cat, 355
Is response to oral sumatriptan in childhood migraine different from adults, 358
Dose-finding studies of rizatriptan (MK-462) in the acute treatment of migraine, 359
The effects of low doses of BMS-180048 compared with placebo in acute migraine, 360
A comparison of oral eletriptan (UK-116,044) (20-80 mg) and oral sumatriptan (100 mg) in the acute treatment of migraine, 368
Confirmation of the long-term safety of 311C90 in the acute oral treatment of migraine, 372
Efficacy of sumatriptan 50 mg/os in the migraine attack. Open study on 50 patients, 383
Post-marketing clinical use- and misuse- of sumatriptan in migraine patients: state of the art, 384
Can sumatriptan be anxiogenic migraineurs, 384
The use of sumatriptan in patients with concomitant epilepsy and migraine, 385
The safety, tolerability and pharmacokinetics of intravenous electriptan (UK-116,044), a new potent and selective "5HT 1D-line" receptor agonist, 385
In vitro pharmacology of electriptan (UK-116,044) a potent partial agonist at the "5HT-1D-like" receptor in the dog saphenous vein, 386
Preclinical in vivo pharmacology of electriptan (UK-116,044): a potent and selective partial agonist at the "5HT 1D-like" receptor, 386
The aborption potential of electriptan (UK-116,044) and sumatriptan, 387
A dose-finding study of eletriptan (UK-116,044) (5-30 mg) for the acute treatment of migraine, 387
Minimal interaction between 311C90, a novel antimigraine compound, and oral pizotifen, 395
Gender and region difference in side-effects induced by sumatriptan, 396
The high efficacy of 311C90 in treating migraine headaches is maintained in patients using oral contraceptives, 396
Chest pain and sumatriptan: a disagreeable sensation or a witness for the prosecution, 397
311C90 has no clinically significant effects on blood pressure, 398
Confirmation of the long-term efficacy of 311C90 in the acute oral treatment of migraine, 399
Confirmation of the long-term safety and efficacy of oral 311C90 in the acute treatment of migraine: demographic analysis from a study > 20,000 treated attacks, 400
Chest symptoms after sumatripan: a two year clinical practice review in 735 consecutive migraine patients, 554
abdominal migraine
Is bowel permeability a measure of abdominal migraine in children?, 355
Is abdominal migraine often environmentally determined?, 378
acetazolamide
Acetazolamide as a confirmatory diagnostic test for migraine headaches, 362
adhesion molecules
CAM (cell adhesion molecules)-based nitrergic mechanisms in experimental migraine, 356
agraphia
Agraphia as the only symptom of a migraine aura, 562
alexithymia
Migraine and alexithymia: a Rorschach study, 383
alniditan
Alniditan in the acute treatment of migraine attacks: a subcutaneous dose-finding study, 497
arteriovenous malformation
Cluster headache syndrome associated with middle cerebral artery arteriovenous malformation, 202
autonomic nervous system
Autonomic nervous system function in migraineurs during headache-free period: a blood pressure and heart rate variability study, 388
Peripheral autonomic potentials in primary headache, 390
Autonomic nervous system and neuroendocrine changes in patients with idiopathic trigeminal neuralgia, 476

blood vessels
Reactions of the middle meningeal artery of the cat to neural and humoral stimulation, 27
Sumatriptan: vasoactive effect on human dural vessels, demonstrated by subselective angiography, 224
Calcitonin gene-related peptide is released from capsaicin-sensitive nerve fibres and induces vasodilation of human cerebral arteries concimitant with activation of adenylyl cyclase, 310
Intracerebral arteries and gadolinium enhancement in migraine without aura, 363
Stimulation of cranial vessels excites neurones in the medial thalamus of the cat, 365
Histamine induces relaxation of the human cerebral artery by activation of endothelial H1-receptors coupled to nitric oxide synthase, 374
Innervation of the human middle meningeal artery: immunohistochemistry, ultrastructure and vasomotility, 374
A novel non-peptide ETA/B receptor antagonist, SB 209670, inhibits trigeminal nerve induced effects in the carotid vascular bed, 379
Relationships between cortical spreading depression and the parasympathetic cerebrovascular innervation, 394
Evaluation of non-invasive techniques to assess vasoconstriction in healthy volunteers using methoxamine as a probe drug, 507
BMS-180048
The effects of low doses of BMS-180048 compared with placebo in acute migraine, 360
c-fiber
Sympathectomy induces C-fiber sprouting and mast cell activation in rat dura mater, 370
calcitonin gene-related peptide
Calcitonin gene-related peptide is released from capsaicin-sensitive nerve fibres and induces vasodilation of human cerebral arteries concimitant with activation of adenylyl cyclase, 310
H a-CGRP in the middle meningeal and temporal arteries of man: binding by autoradiography and vasomotor responses in vitro, 373
cannabis
An epidemiological study on the activity of cannabis in idiopathic headache, 377
cerebral blood flow
Regional cerebral blood flow in patients with cluster headache during cluster period. A single photon emission tomography (SPET) study using Tc 99M HMPAO, 365
cerebrospinal fluid pressure
Primary low cerebrospinal fluid pressure syndrome with galactorrhea: findings at MR imaging, 124
chest pain
Chest pain and sumatriptan: a disagreeable sensation or a witness for the prosecution, 397
chronic daily headache
Demographic and clinical characteristics of patients with episodic migraine versus chronic daily headache, 44
Psychiatric consultation of patients with chronic daily headache in Turkey, 393
The International Headache Society classification of chronic daily and near-daily headaches: a critique of the criticism, 407
chronic tension-type headache
Exteroceptive suppression of temporal muscle activity is normal in chronic tension-type headache and not related to actual headache state, 251
chronic paroxysmal hemicrania
Neuropeptide changes in a case of chronic paroxysmal hemicrannia-evidence for trigemino-parasympathetic activation, 448
classification—controversy
Migraine and tension-type headache are separate disorders, 217
Migraine and tension-type headache are not separate disorders, 220
Are the International Headache Society criteria for headache useful?, 289
The International Headache Society classification and diagnostic criteria are valid and extremely useful, 293
The International Headache Society classification: to use or not to use?, 295
classification
IHS criteria and gender: a study on migraine and tension-type headache in children and adolesents, 107
A nosographic analysis of the migraine aura in a general population, 380
Migrainous disorder and its relation to migraine without aura and migraine with aura, 431
The International Headache Society classification of chronic daily and near-daily headaches: a critique of the criticism, 407
cluster headache
Pain pressure threshold in cluster headache patients, 62
IV histamine therapy in intractable cluster headaches, 357
Study of indole metabolism in cluster headche sufferers, 358
The m-chlorophenylpiperazine test in cluster headache: a study on central serotoninergic activity, 358
Regional cerebral blood flow in patients with cluster headache during cluster period. A single photon emission tomography (SPET) study using Tc 99M HMPAO, 365
"Continuous" cluster like headache with response to sumatriptan and steroids, 392
cluster headache—clinical
Cluster headache syndrome associated with middle cerebral artery arteriovenous malformation, 202
Spectral analysis of heart rate fluctuations in cluster headache, 357
Natural history of cluster headache, 390
Sluder's syndrome and cluster headache, 391
Premonitory symptoms and precipitating (triggering) factors in cluster headache (CH), 391
cluster headache—genetics
Familial cluster headache, 391
cluster headache—treatment
Melatonin vs. placebo in the prophyalxis of cluster headache: a double-blind pilot study with parallel groups, 494

controversy
The primary headache disorders—apple sauce or fruit cocktail?, 223
corticosteroids
"Continuous" cluster like headache with response to sumatriptan and steroids, 392
CSF
Cerebrospinal fluid tyrosine and 3,4-dihydroxyphenylacetic acid levels in migraine patients, 56
CT scan
CT scan in headache patients in an outpatient clinic, 390
cyclandelate
Cyclandelate in the prophylaxis of migraine: a randomized, parallel, double-blind study in comparison with placebo and propranolol, 441
depression
Hyperprolactinemia and depression induced by oxetorone, 560
dihydroergotamine
Migraine prophylaxis with slow-release dihydroergotamine, 398
drug-induced headache
Amitryptyline and dexamethasone combined treatment in drug-induced headache, 197
Serotonin receptor plasticity in patients with analgesic-induced headache, 374
Long-term outcome of patients with headache and drug abuse after inpatient withdrawal: five-year follow-up, 481
electriptan (UK-116,044)
The safety, tolerability and pharmacokinetics of oral eletriptan (UK-116,044) a potent and selective 5HT1D-like receptor agonist, 368
A comparison of oral eletriptan (UK-116,044) (20-80 mg) and oral sumatriptan (100 mg) in the acute treatment of migraine, 368
Preclinical in vivo pharmacology of electriptan (UK-116,044): a potent and selective partial agonist at the "5HT 1D-like" receptor, 386
The pharmacokinetics of eletriptan (UK-116,044) in rats and dogs, 387
The aborption potential of electriptan (UK-116,044) and sumatriptan, 387
A dose-finding study of eletriptan (UK-116,044) (5-30 mg) for the acute treatment of migraine, 387
electromyographic—biofeedback
Electromyographic-biofeedback (EMG-BFB) efficacy to treatment of juvenile tension type headache: results at 2 years follow-up, 388
epidemiology
An epidemiological study on the activity of cannabis in idiopathic headache, 377
An epidemiologic study of headache among children and adolescents, 545
epilepsy
Occipital paroxysms in children with migraine and epilepsy, 364
The use of sumatriptan in patients with concomitant epilepsy and migraine, 385
ergotamine
Side effects of ergotamine, 5
Pain control in migraine attacks: results from a double-blind, randomized, within-patient, placebo-controlled trial comparing diclofenac-K and ergotamine + caffeine, 359
Effects of ergotamine on myocardial blood flow—a pet study, 373
estradiol
Distinct properties of signal transduction in patients with migraine, menstrual migraine, postmenopausal headache and effects of estradiol treatment, 356
event-related potential
Predictability of a migraine attack? An event-related potential study, 363
evoked potentials
Pattern reversal visual evoked potentials in children with migraine or tension-type headache, 104
exterocetive suppression
Exteroceptive suppression of temporal muscle activity is normal in chronic tension-type headache and not related to actual headache state, 251
facial ecchymosis
Recurrent paroxysmal headache associated with facial ecchymosis, 341
factor V
Point mutation (Arg506-Gln) of factor V in migraine with and without aura. A pilot study, 394
familial hemiplegic migraine
Familial hemiplegic migraine: a clinical comparison of families linked and unlinked to chromosome 19, 153
Stroke as first episode of familial hemiplegic migraine, 379
Classification problems in familial hemiplegic migraine, 384
fenfluramine induced headache
Fenfluramine induced headache: characteristics and biochemistry, 364
fibromyalgia
Fibromyalgia (alias central panalgia): the severest expression of dysnociception, 366
flunarizine
Post-marketing cohort study comparing the safety and efficacy of flunarizine and propranolol in the prophylaxis of migraine, 328
Long-term follow-up after flunarizine or nimodipine discontinuation in migraine patients, 337
Freud
Freud and migraine: the beginning of a psychodynamically oriented view of headache a hundred years go, 22
gabapentin
Gabapentin in migraine prophylaxis, 367
gliadin sensitivity
Screening of gliadin sensitivity in children suffering from migraine, 393
glyceryl trinitrate
Glyceryl trinitrate produces prolonged changes in cortical nitric oxide release in the anaesthetized cat, 379
head trauma
Migraine associated with head trauma, 375
headache
An epidemiological study on the activity of cannabis in idiopathic headache, 377

headache—clinical
A quality of life instrument for adolescents with chronic headache, 183
Differential sensitivity to morphine challenge in migraine sufferers and headache-exempt subjects, 297
Recurrent paroxysmal headache associated with facial ecchymosis, 341
CT scan in headache patients in an outpatient clinic, 390
headache—historical
Freud and migraine: the beginning of a psychodynamically oriented view of headache a hundred years go, 22
Headache as an occupational illness in the treatise "De morbis artificum diatriba" of Bernardino Ramazzini, 87
A 6th Century Irish headache cure and its use in a South Germany monastery, 536
headache—epidemiology
Epidemiological study of headache in childhood, 401
headache—pathogenesis
Peripheral autonomic potentials in primary headache, 390
Electrominographical ischemic test symptom evaluation and intra and extracellular magnesium concentration in headache patients, 402
headache—pediatric
Pattern reversal visual evoked potentials in children with migraine or tension-type headache, 104
IHS criteria and gender: a study on migraine and tension-type headache in children and adolesents, 107
Recurrent ophthalmoplegia in childhood: diagnostic and etiologic considerations, 276
Is bowel permeability a measure of abdominal migraine in children?, 355
Occipital paroxysms in children with migraine and epilepsy, 364
The results of two studies on the behaviorial treatment of young headache patients, 367
Brain MRI in children with migraine, 541
An epidemiologic study of headache among children and adolescents, 545
headache—therapy
Ketoprofen, paracetamol and placebo in the treatment of episodic tension-type headache, 117
hemicrania
Hemicrania with trigeminal neuralgia, 380
histamine
IV histamine therapy in intractable cluster headaches, 357
Histamine induces relaxation of the human cerebral artery by activation of endothelial H1-receptors coupled to nitric oxide synthase, 374
Histamine inhalation is a specific but insensitive laboratory test for migraine, 550
hyperprolactinemia
Hyperprolactinemia and depression induced by oxetorone, 560
hypertension headache
Simultaneous therapeutic intervention in patients with headache and arterial hypertension, 382
idiopathic stabbing headache
Idiopathic stabbing headache (jabs and jolts syndrome), 93
induced headache
Serotonin receptor adaptation in patients with analgesic induced headache, 419
Platelet serotonin in patients with analgesic induced headache, 423
ketamine
Relief of migraine attack with N-methyl-D-aspartic acid receptor antagonist ketamine: a double-blind comparison with placebo-theoretic implications, 372
m-chlorophenylpiperazine
The m-chlorophenylpiperazine test in cluster headache: a study on central serotoninergic activity, 358
magnesium
Prophylaxis of migraine with oral magnesium; results from a prospective, multi-center, placebo-controlled and double-blind randomized study, 257
Electrominographical ischemic test symptom evaluation and intra and extracellular magnesium concentration in headache patients, 402
Magnesium in the prophylaxis of migraine—double-blind placebo controlled study, 436
magnetic resonance imaging
Brain MRI in children with migraine, 541
mast cell
Sympathectomy induces C-fiber sprouting and mast cell activation in rat dura mater, 370
melatonin
Melatonin vs. placebo in the prophyalxis of cluster headache: a double-blind pilot study with parallel groups, 494
menstrual migraine
"Menstrual" migraine: towards a definition, 11
Distinct properties of signal transduction in patients with migraine, menstrual migraine, postmenopausal headache and effects of estradiol treatment, 356
Oral 311C90 is effective in treatment of menstrual migraine, 400
Platelet serotonin pathway in menstrual migraine, 427
Variations in the platelet arginine/nitric oxide pathway during the ovarian cycle in females affected by menstrual migraine, 468
methoxamine
Evaluation of non-invasive techniques to assess vasoconstriction in healthy volunteers using methoxamine as a probe drug, 507
middle meningeal artery
Reactions of the middle meningeal artery of the cat to neural and humoral stimulation, 27
migraine
The primary headache disorders—apple sauce or fruit cocktail?, 223
migraine—clinical
"Menstrual" migraine: towards a definition, 11
Demographic and clinical characteristics of patients with episodic migraine versus chronic daily headache, 44
Pattern reversal visual evoked potentials in children with migraine or tension-type headache, 104
IHS criteria and gender: a study on migraine and tension-type headache in children and adolesents, 107

Should we investigate migraine of late onset?, 201
Migraine and tension-type headache are separate disorders, 217
Migraine and tension-type headache are not separate disorders, 220
Distinct properties of signal transduction in patients with migraine, menstrual migraine, postmenopausal headache and effects of estradiol treatment, 356
Migraine without aura and migaine with aura are distinct clinical entities; a study of 484 male and female migraineurs from the general population, 361
Acetazolamide as a confirmatory diagnostic test for migraine headaches, 362
Predictability of a migraine attack? An event-related potential study, 363
Risk factors for a poor outcome of migraine without aura. A case-control study, 369
Migraine associated with head trauma, 375
Perception of health and quality of life of people with frequent migraine attacks, 376
The relevance of psychological factors in migraine, 377
Clinical pattern and psychic sequelae of migraine, 378
Hemicrania with trigeminal neuralgia, 380
The hyperventilation migraine—a new clinical entity?, 381
Migraine and alexithymia: a Rorschach study, 383
Histamine inhalation is a specific but insensitive laboratory test for migraine, 550

migraine—epidemiology
MIG ACCESS: a population-based, nationwide, comparative survey of access to care in migraine in France, 50
Work-related disability: results from the American migraine study, 231
Migraine without aura and migraine with aura are distinct clinical entities: study of 484 male and female migraineurs from the general population, 239
Incidence of severe migraine in the gazel cohort, 361
A nosographic analysis of the migraine aura in a general population, 380

migraine—genetics
Familial hemiplegic migraine: a clinical comparison of families linked and unlinked to chromosome 19, 153
The family history of migraine. Direct versus indirect information, 156
Migraine without aura and migraine with aura are inherited disorders, 305
Migrainous disorder and its relation to migraine without aura and migraine with aura. A genetic epidemiological study, 362
The family history of migraine. Direct versus indirect information, 392
Analysis of 31 families with an apparently autosomal dominant transmission of migraine with aura in the nuclear family, 393
Point mutation (Arg506-Gln) of factor V in migraine with and without aura. A pilot study, 394
Migraine association and linkage analyses of an MSPI polymorphism in the human 5HT2a receptor gene, 463

migraine—pathogenesis
Painful vein overdistension in migraine patients: no relationship with serotoninergic parameters, 37
Red wine-induced release of ^{14}CJ5-hydroxytryptamine from platelets of migraine patients and controls, 41
Cerebrospinal fluid tyrosine and 3,4-dihydroxyphenylacetic acid levels in migraine patients, 56
Inhalational anesthetics inhibit spreading depression: relevance to migraine, 87
Regional cerebral blood flow (rCBF) in migraine during the interictal period: different rCBF patterns in patients with and without aura, 161
Zolmitriptan inhibits c-fos expression in the dorsal horn of the medulla and upper cervical horn evoked by sagittal sinus stimulation in the cat, 355
Intracerebral arteries and gadolinium enhancement in migraine without aura, 363
Sympathectomy induces C-fiber sprouting and mast cell activation in rat dura mater, 370
Parasympathetic stimulation induces plasma protein extravasation in rat dura mater, 370
Red wine and vodka differ in their ability to reduce stress, 378
Glyceryl trinitrate produces prolonged changes in cortical nitric oxide release in the anaesthetized cat, 379
Persistent pain and non-painful disagreeable sensation after overdistension test stress the entity of "pain memory" linked to the long-term potentiation in migraine sufferers, 380
Electroencephalogram and transcranial Doppler in migraine with aura and in confusional migraine in children, 388
Autonomic nervous system function in migraineurs during headache-free period: a blood pressure and heart rate variability study, 388
Discrimination between migraine patients and normals based on the steady-state visual evoked potentials and (SSVEPs): discriminant analysis and artificial neuronal network methods, 389
Migraine and oxidative stress involvement on platelet responsiveness, 395
Platelet serotonin pathway in menstrual migraine, 427
Visual system dysfunction in migraine: a review of clinical and psychophysical findings, 525

migraine—pediatric
Is response to oral sumatriptan in childhood migraine different from adults, 358
Headaches not fulfilling the criteria of migraine and tension-type headache a follow-up study in children and adolescents, 362
Migraine with aura in childhood and adolescence—clinical features of the aura, 376
Is abdominal migraine often environmentally determined?, 378
Electroencephalogram and transcranial Doppler in migraine with aura and in confusional migraine in children, 388
Epidemiological study of headache in childhood, 401

migraine—neurophysiology
Photic driving in migraine: correlations with clinical features, 246

migraine—therapy
Pilot study of MK-462 in migraine, 113
Prophylaxis of migraine with oral magnesium; results

from a prospective, multi-center, placebo-controlled and double-blind randomized study, 257
Risk factors for headache recurrence after sumatriptan: a study in 366 migraine patients, 264
311C90 (Zolmitriptan), a novel centrally and peripheral acting oral 5-hydroxytryptamine-1D agonist: a comparison of its absorption during a migraine attack and in a migraine-free period, 270
Serotonin syndrome complicating migraine pharmacotherapy, 323
Long-term follow-up after flunarizine or nimodipine discontinuation in migraine patients, 337
Pain control in migraine attacks: results from a double-blind, randomized, within-patient, placebo-controlled trial comparing diclofenac-K and ergotamine + caffeine, 359
Dose-finding studies of rizatriptan (MK-462) in the acute treatment of migraine, 359
The effects of low doses of BMS-180048 compared with placebo in acute migraine, 360
Gabapentin in migraine prophylaxis, 367
A comparison of oral eletriptan (UK-116,044) (20-80 mg) and oral sumatriptan (100 mg) in the acute treatment of migraine, 368
The safety, tolerability and pharmacokinetics of oral eletriptan (UK-116,044) a potent and selective 5HT1D-like receptor agonist, 368
Relief of migraine attack with N-methyl-D-aspartic acid receptor antagonist ketamine: a double-blind comparison with placebo-theoretic implications, 372
Effects of ergotamine on myocardial blood flow—a pet study, 373
Sodium valproate in the prevention of migraine: case studies on the effect of withdrawal of long term therapy, 377

migraine—treatment
Side effects of ergotamine, 5
Post-marketing cohort study comparing the safety and efficacy of flunarizine and propranolol in the prophylaxis of migraine, 328
Confirmation of the long-term safety of 311C90 in the acute oral treatment of migraine, 372
Effects of orally administrered naltrexone in healthy volunteers and migraine sufferers, 381
Nabumetone in migraine prophylaxis, 382
Efficacy of sumatriptan 50 mg/os in the migraine attack. Open study on 50 patients, 383
Can sumatriptan be anxiogenic migraineurs, 384
Post-marketing clinical use- and misuse- of sumatriptan in migraine patients: state of the art, 384
The safety, tolerability and pharmacokinetics of intravenous electriptan (UK-116,044), a new potent and selective "5HT 1D-line" receptor agonist, 385
The use of sumatriptan in patients with concomitant epilepsy and migraine, 385
In vitro pharmacology of electriptan (UK-116,044) a potent partial agonist at the "5HT-1D-like" receptor in the dog saphenous vein, 386
Preclinical in vivo pharmacology of electriptan (UK-116,044): a potent and selective partial agonist at the "5HT 1D-like" receptor, 386
The pharmacokinetics of eletriptan (UK-116,044) in rats and dogs, 387
The aborption potential of electriptan (UK-116,044) and sumatriptan, 387
A dose-finding study of eletriptan (UK-116,044) (5-30 mg) for the acute treatment of migraine, 387
311C90 and sumatripan produce indistinguishable CNS adverse event profiles, 389
Screening of gliadin sensitivity in children suffering from migraine, 393
Minimal interaction between 311C90, a novel antimigraine compound, and oral pizotifen, 395
The combination of 311C90, a novel antimigraine compound, and oral propranolol in healthy subjects, 395
The high efficacy of 311C90 in treating migraine headaches is maintained in patients using oral contraceptives, 396
Resolution without discomfort of analgesic drug abuse by suign 24 hours infusion of NMDA receptor antagonist in migraine, 397
Migraine prophylaxis with slow-release dihydroergotamine, 398
311C90 has no clinically significant effects on blood pressure, 398
Clinical effectiveness of verapamil in the management of migraine pain: a retrospective analysis, 398
Oral 311C90 is effective in treatment of menstrual migraine, 400
Confirmation of the long-term safety and efficacy of oral 311C90 in the acute treatment of migraine: demographic analysis from a study > 20,000 treated attacks, 400
Headache induced by a nitric oxide donor (nitroglycerin) responds to sumatriptan. A human model for development of migraine drugs, 412
Alniditan in the acute treatment of migraine attacks: a subcutaneous dose-finding study, 497
Chest symptoms after sumatripan: a two year clinical practice review in 735 consecutive migraine patients, 554
Magnesium in the prophylaxis of migraine—double-blind placebo controlled study, 436
Cyclandelate in the prophylaxis of migraine: a randomized, parallel, double-blind study in comparison with placebo and propranolol, 441

migraine with aura
Migraine with aura in childhood and adolescence—clinical features of the aura, 376

migraine without aura
Migraine without aura and migraine with aura are distinct clinical entities: study of 484 male and female migraineurs from the general population, 239

migraine without aura—treatment
Preventive drug use in migraine without aura, 383

migrainous otalgia
Migrainous otalgia—a new syndrome, 401

morphine
Differential sensitivity to morphine challenge in migraine sufferers and headache-exempt subjects, 297

MR imaging
Primary low cerebrospinal fluid pressure syndrome with galactorrhea: findings at MR imaging, 124

myocardial blood flow
Effects of ergotamine on myocardial blood flow—a pet study, 373
nabumetone
Nabumetone in migraine prophylaxis, 382
naltrexone
Effects of orally administrered naltrexone in healthy volunteers and migraine sufferers, 381
neurogenic control
Stimulation of cranial vessels excites neurones in the medial thalamus of the cat, 365
neuropeptides
Neuropeptide changes in a case of chronic paroxysmal hemicrannia-evidence for trigemino-parasympathetic activation, 448
nimodipine
Long-term follow-up after flunarizine or nimodipine discontinuation in migraine patients, 337
nitric oxide
Effect of nitric oxide donor (glyceryl trinitrate) on nonciceptive thresholds in man, 169
Changes in nitric oxide levels and in transcranial Doppler findings before, during and after migraine attacks, 364
Glyceryl trinitrate produces prolonged changes in cortical nitric oxide release in the anaesthetized cat, 379
Variations in the platelet arginine/nitric oxide pathway during the ovarian cycle in females affected by menstrual migraine, 468
Headache induced by a nitric oxide donor (nitroglycerin) responds to sumatriptan. A human model for development of migraine drugs, 412
nitric oxide synthase
Histamine induces relaxation of the human cerebral artery by activation of endothelial H1-receptors coupled to nitric oxide synthase, 374
NMDA antagonists
Dosing of oral sumatriptan—a review of our first 104 patients, 371
NMDA receptor antagonist
Resolution without discomfort of analgesic drug abuse by using 24 hours infusion of NMDA receptor antagonist in migraine, 397
occipital paroxysms
Occipital paroxysms in children with migraine and epilepsy, 364
oral contraceptives
The high efficacy of 311C90 in treating migraine headaches is maintained in patients using oral contraceptives, 396
oxetorone
Hyperprolactinemia and depression induced by oxetorone, 560
pain pressure threshold
Pain pressure threshold in cluster headache patients, 62
pain
Effect of nitric oxide donor (glyceryl trinitrate) on nonciceptive thresholds in man, 169
Alteration in the central excitatory circuits of pain: a possible pathogenetic mechanism, 370
Persistent pain and non-painful disagreeable sensation after overdistension test stress the entity of "pain memory" linked to the long-term protentiation in migraine sufferers, 380
parasympathetic stimulation
Parasympathetic stimulation induces plasma protein extravasation in rat dura mater, 370
PET
Effects of ergotamine on myocardial blood flow—a pet study, 373
photic driving
Photic driving in migraine: correlations with clinical features, 246
pizotifen
Minimal interaction between 311C90, a novel antimigraine compound, and oral pizotifen, 395
platelets
Red wine-induced release of ^{14}CJ5-hydroxytryptamine from platelets of migraine patients and controls, 41
Migraine and oxidative stress involvement on platelet responsiveness, 395
Variations in the platelet arginine/nitric oxide pathway during the ovarian cycle in females affected by menstrual migraine, 468
platelet serotonin
Distinct properties of signal transduction in patients with migraine, menstrual migraine, postmenopausal headache and effects of estradiol treatment, 356
Platelet serotonin in patients with analgesic induced headache, 423
Platelet serotonin pathway in menstrual migraine postmenopausal headache, 427
posttraumatic headache
Chronic posttraumatic headaches classified and compared to natural headache, 486
propranolol
Post-marketing cohort study comparing the safety and efficacy of flunarizine and propranolol in the prophylaxis of migraine, 328
The combination of 311C90, a novel antimigraine compound, and oral propranolol in healthy subjects, 395
Cyclandelate in the prophylaxis of migraine: a randomized, parallel, double-blind study in comparison with placebo and propranolol, 441
pseudotumor cerebri
Papilledema-negative pseudotumor cerebri mimicking transformed migraine, 451
quality of life
A quality of life instrument for adolescents with chronic headache, 183
Work-related disability: results from the American migraine study, 231
Perception of health and quality of life of people with frequent migraine attacks, 376
recurrent ophthalmoplegia
Recurrent ophthalmoplegia in childhood: diagnostic and etiologic considerations, 276
recurrent paroxysmal headache
Recurrent paroxysmal headache associated with facial ecchymosis, 341
red wine
Red wine and vodka differ in their ability to reduce stress, 378

regional cerebral blood flow
Regional cerebral blood flow (rCBF) in migraine during the interictal period: different rCBF patterns in patients with and without aura, 161
rizatriptan
Dose-finding studies of rizatriptan (MK-462) in the acute treatment of migraine, 359
sagittal sinus stimulation
Sagittal sinus stimulation selectively increases cerebral blood flow compared to extracerebral blood flow in the anaesthetized cat, 366
SB 209670
A novel non-peptide ETA/B receptor antagonist, SB 209670, inhibits trigeminal nerve induced effects in the carotid vascular bed, 379
serotonin
Red wine-induced release of ^{14}CJ5-hydroxytryptamine from platelets of migraine patients and controls, 41
The m-chlorophenylpiperazine test in cluster headache: a study on central serotoninergic activity, 358
Serotonin receptor adaptation in patients with analgesic induced headache, 419
Migraine association and linkage analyses of an MSPI polymorphism in the human serotonin (5HT2a) receptor gene, 463
serotonin receptors
Serotonin receptor plasticity in patients with analgesic-induced headache, 374
serotonin syndrome
Serotonin syndrome complicating migraine pharmacotherapy, 323
sodium valproate
Sodium valproate in the prevention of migraine: case studies on the effect of withdrawal of long term therapy, 377
spreading depression
Inhalational anesthetics inhibit spreading depression: relevance to migraine, 87
Relationships between cortical spreading depression and the parasympathetic cerebrovascular innervation, 394
stroke
Stroke as first episode of familial hemiplegic migraine, 379
sumatriptan
Sumatriptan: vasoactive effect on human dural vessels, demonstrated by subselective angiography, 224
Risk factors for headache recurrence after sumatriptan: a study in 366 migraine patients, 264
Autoradiographic distribution of [3H] sumatriptan-binding sites in post-mortem human brain, 317
Anatomical and pharmacological distribution of 3H-sumatriptan binding sites in human brainstem, 356
A comparison of oral eletriptan (UK-116,044) (20-80 mg) and oral sumatriptan (100 mg) in the acute treatment of migraine, 368
Is response to oral sumatriptan in childhood migraine different from adults, 358
The problem of refractoriness to sumatriptan: does it truly exist?, 360
Dosing of oral sumatriptan—a review of our first 104 patients, 371
DHE-45 in the prophylaxis of menstrually related migraine, 371
Efficacy of sumatriptan 50 mg/os in the migraine attack. Open study on 50 patients, 383
Can sumatriptan be anxiogenic migraineurs, 384
Post-marketing clinical use- and misuse- of sumatriptan in migraine patients: state of the art, 384
The use of sumatriptan in patients with concomitant epilepsy and migraine, 385
The aborption potential of electriptan (UK-116,044) and sumatriptan, 387
The pharmacokinetics of eletriptan (UK-116,044) in rats and dogs, 387
311C90 and sumatripan produce indistinguishable CNS adverse event profiles, 389
"Continuous" cluster like headache with response to sumatriptan and steroids, 392
Gender and region difference in side-effects induced by sumatriptan, 396
Chest pain and sumatriptan: a disagreeable sensation or a witness for the prosecution, 397
Headache induced by a nitric oxide donor (nitroglycerin) responds to sumatriptan. A human model for development of migraine drugs, 412
Chest symptoms after sumatripan: a two year clinical practice review in 735 consecutive migraine patients, 554
SUNCT syndrome
SUNCT syndrome associated with cavernous angioma of the brainstem, 503
tension-type headache
Pattern reversal visual evoked potentials in children with migraine or tension-type headache, 104
Ketoprofen, paracetamol and placebo in the treatment of episodic tension-type headache, 117
Increased familial occurrence of chronic tension-type headache, 369
tension-type headache—clinical
Muscular disorders in tension-type headache, 97
IHS criteria and gender: a study on migraine and tension-type headache in children and adolesents, 107
Migraine and tension-type headache are not separate disorders, 220
Migraine and tension-type headache are separate disorders, 217
The primary headache disorders—apple sauce or fruit cocktail?, 223
tension-type headache—pathogenesis
Initiating mechansims of experimentally induced tension-type headache, 175
Exteroceptive suppression of temporal muscle activity is normal in chronic tension-type headache and not related to actual headache state, 251
tension-type headache—treatment
Manual therapy in chronic tension headache: a cross-over controlled experience, 381
Electromyographic-biofeedback (EMG-BFB) efficacy to treatment of juvenile tension type headache: results at 2 years follow-up, 388
transcranial doppler
Changes in nitric oxide levels and in transcranial Doppler findings before, during and after migraine attacks, 364

Electroencephalogram and transcranial Doppler in migraine with aura and in confusional migraine in children, 388
trigeminal neuralgia
Hemicrania with trigeminal neuralgia, 380
Autonomic nervous system and neuroendocrine changes in patients with idiopathic trigeminal neuralgia, 476
trigeminal nerve
A novel non-peptide ETA/B receptor antagonist, SB 209670, inhibits trigeminal nerve induced effects in the carotid vascular bed, 379
tyrosine
Cerebrospinal fluid tyrosine and 3,4-dihydroxy-phenylacetic acid levels in migraine patients, 56
UK-116,044
The safety, tolerability and pharmacokinetics of intravenous electriptan (UK-116,044), a new potent and selective "5HT 1D-line" receptor agonist, 385
verapamil
Clinical effectiveness of verapamil in the management of migraine pain: a retrospective analysis, 398
vigabatrin
Vigabatrin in the prophylaxis of drug resistant migraine: a double blind crossover comparison with placebo, 367
visual evoked potentials
Discrimination between migraine patients and normals based on the steady-state visual evoked potentials and (SSVEPs): discriminant analysis and artificial neuronal network methods, 389
visual system
Visual system dysfunction in migraine: a review of clinical and psychophysical findings, 525
zolmitriptan
Zolmitriptan inhibits c-fos expression in the dorsal horn of the medulla nad upper cervical horn evoked by sagittal sinus stimulation in the cat, 355

Cephalalgia 1996;16. Oslo. ISSN 0333-1024
